

MOISES TORRES

Senior Backend / Full-Stack Software Engineer

Venezuela | Remote | Full-time | Part-time | Selected freelance work

Phone: [+58 412 7171 292](tel:+584127171292) Email: loldlm1@gmail.com LinkedIn: linkedin.com/in/loldlm1 GitHub: github.com/loldlm1 Product: tradingsniperpanel.com

PROFESSIONAL SUMMARY

Senior backend and full-stack software engineer with about ten years of experience building and maintaining web products, APIs, integrations, and production systems. My strongest stacks are Ruby on Rails and Elixir/Phoenix, complemented by hands-on work with Next.js, TypeScript, PostgreSQL, GraphQL, cloud infrastructure, CI/CD, RAG, and AI provider integrations. I am comfortable owning a feature from backend design and data modeling through frontend integration, testing, deployment, and production support.

TECHNICAL SKILLS

Backend Ruby on Rails, Elixir / Phoenix, Node.js, Python

APIs REST, GraphQL, webhooks, authentication, authorization, payments

Frontend React, Next.js, TypeScript, JavaScript, Tailwind CSS, WCAG

Data PostgreSQL, MySQL, NoSQL, pgvector, query and schema optimization

Cloud / DevOps Docker, Kamal, VPS, AWS, GCP, Kubernetes, CI/CD

AI / Agentic OpenAI, Claude, Gemini, OpenRouter, RAG, MCP tools, Codex, Claude Code

PROFESSIONAL EXPERIENCE

Freelance and Product Engineering

Jan 2024 - Present | Remote

Senior Full-Stack / Backend Engineer

Build and deploy full-stack products with Rails, Elixir/Phoenix, Next.js, PostgreSQL, REST and GraphQL APIs, third-party services, and cloud infrastructure.

Own backend design, administrative workflows, payments, automation, integrations, and product interfaces from initial modeling through release and maintenance.

Build RAG and AI-assisted features with Elixir, PostgreSQL/pgvector, OpenRouter, OpenAI, Claude, and Gemini while keeping business data and rules in the application backend.

Use Codex and Claude Code as engineering tools for research, implementation, refactoring, documentation, and validation, with the same review and production safeguards as other code.

Profit Secured FX

Jan 2023 - Jan 2024 | Remote

Backend Software Engineer

Designed and maintained backend systems and GraphQL APIs for a fintech product, focusing on reliable behavior, clear queries, and maintainable services.

Developed unit tests with coverage reaching 99% in covered areas, strengthening confidence in backend changes and regression prevention.

Improved collaboration and delivery consistency through disciplined Git, GitHub, review, and version-control practices.

DailyDrip -> SmoothTerminal -> Daring Bit Assembly (DBA)

2016 - Jan 2023 | Remote

Backend / Full-Stack Software Engineer

Worked through the company's evolution and delivered software for international clients across SaaS, fintech, nonprofit, education, and internal business products.

Built and maintained Rails and Elixir/Phoenix applications using PostgreSQL, GraphQL, REST APIs, frontend integrations, background workflows, and cloud services.

Implemented features, refactored business logic, optimized queries, fixed critical defects, and contributed to automated testing, CI/CD, accessibility, and performance work.

Contributed to products including Agency Rocket, B Charitable, DailyDrip, Phaast, and QuantHub without claiming sole product ownership.

SELECTED PROJECTS

Trading Sniper Panel | 2024 - Present Rails, PostgreSQL, Stripe, Docker, Kamal, MQL5, MetaTrader 5

Serve as CTO and lead product engineering for a partnered SaaS and digital-product business for MetaTrader 5 traders, covering accounts, plans, licensing, payments, catalog workflows, and product access.

The trader partner provides the trading strategy, domain expertise, and originating business ideas; I build the web platform, Expert Advisors, MQL5/MT5 integrations, and technical operations.

Lead deployment and maintenance through Docker, Kamal, and VPS infrastructure.

AI-Assisted Ecommerce and RAG Platform | Mar 2026 - Present | Private Spree, Rails, Next.js, Elixir, PostgreSQL, pgvector, OpenRouter
product

Built the Spree/Rails commerce backend, Next.js storefront, and Elixir assistant services for catalog-grounded discovery, comparison, inventory context, and support.

Implemented pgvector retrieval and routing across OpenAI, Claude, and Gemini while keeping commerce data and actions under Rails rules.

Agency Rocket Elixir, Phoenix, GraphQL, PostgreSQL, Vue, Google Cloud

Worked on an integration-heavy insurance sales platform as part of DBA's engineering team, implementing features and refactoring existing behavior.

Contributed to backend integrations, testing, debugging, and performance maintenance as one member of the product team.

B Charitable Ruby on Rails, PostgreSQL, third-party APIs

Contributed within DBA's team to B Charitable, a charitable-fintech platform with extensive external integrations; my records do not support claiming specific module ownership.

Language in Motion | 2019 | 6-month independent freelance engagement Ruby on Rails, automated testing, WCAG accessibility

Delivered Rails full-stack features, automated tests, WCAG-oriented accessibility fixes, and production bug resolution independently from DBA employment.

WhatsApp Automation and System Integrations Baileys, REST APIs, webhooks, backend services, LLMs

Connected WhatsApp conversations to backend workflows, external services, databases, and AI-assisted processes through APIs and webhooks.

Additional DBA Backend Work Ruby on Rails, Elixir / Phoenix, CI/CD, automated testing, performance

Delivered features and critical bug fixes for DailyDrip, and contributed to early Elixir/Phoenix implementation, CI/CD, and testing work for Phaast.

Supported Rails full-stack functionality, automated tests, and performance-oriented maintenance for QuantHub and other client systems.

EDUCATION

Full-Stack Development Bootcamp
Acamedia Hack | Caracas, Venezuela | 2016 - 2017
Ruby on Rails, JavaScript, RESTful APIs, and full-stack web development.
